Chapter 1—Preliminary	1
1.01 Name	1
1.03 Authority	1
1.04 Definitions	1
1.05 References to AS/NZS standards, TSOs, ETSOs etc.	12
1.06 References in type design and certification documents—EDTO.....	13
Chapter 2—Extended diversion time operations (EDTO)	14
Division 1—Criteria for the grant of EDTO approval	14
2.01 Scope of Division 1, Chapter 2	14
2.02 Turbine-engine aeroplanes	14
2.03 Type design and certification documents	14
2.04 Capability of aeroplane for EDTO—general	14
2.05 Capability of operator—EDTO required system serviceability	15
2.06 Diversion time for 2-engine aeroplanes	16
2.07 Diversion time for 3- or 4-engine aeroplanes.....	16
2.08 Polar region	16
2.09 Care and safety of passengers and crew	17
Division 2—Form of application for EDTO approval	18
2.10 Scope of Division 2, Chapter 2	18
2.11 Form of application	18
Division 3—Factors to be considered by CASA in approving EDTO	20
2.12 Scope of Division 3, Chapter 2	20
2.13 Safety compensating factors.....	20
2.14 Capability and competence to conduct EDTO	20
Division 4—Requirements for conduct of EDTO	21
2.15 Scope of Division 4, Chapter 2	21
2.16 Flight planning limitations for all EDTO flights.....	21
2.17 Additional flight planning limitations—EDTO beyond 180 minutes	21
2.18 Flight dispatch requirements for EDTO	22
2.19 Dispatch requirements for EDTO beyond 180 minutes	23
2.20 In-flight operational procedures for EDTO.....	24
Division 5—General conditions on EDTO approvals	26
2.21 Scope of Division 5, Chapter 2	26
2.22 EDTO procedures—flight dispatcher duties	26
2.23 Training and checking—flight dispatchers	26
2.24 Quarterly EDTO summary reports—2-engine aeroplanes	26
2.25 Navigation documents for EDTO.....	27
2.26 In-flight event reporting for EDTO	28
Chapter 3—Carriage of documents and emergency and survival equipment information	29
Division 1—Flight related documents	29
3.01 Carriage of documents—all flights	29
3.02 Carriage of documents—flights that begin or end outside Australian territory	30
3.03 Keeping and updating documents etc.....	30

Division 2—Emergency and survival equipment	31
3.04 Information about emergency and survival equipment.....	31
Chapter 4—Flight preparation (Part 121 alternate aerodromes) requirements	32
Division 1—Preliminary	32
4.01 Scope of Chapter 4	32
4.03 Definition of <i>isolated destination aerodrome</i>	32
4.04 Definition of <i>relevant weather conditions</i>	33
4.05 Estimated time of use of aerodromes for flight preparation (Part 121 alternate aerodromes) requirements	33
Division 2—Flight preparation (Part 121 alternate aerodrome) requirements	35
4.06 Certain weather forecast requirements.....	35
4.07 Take-off alternate aerodromes.....	37
4.08 Destination alternate aerodromes	38
4.09 Planning destination alternate aerodrome—exception relating to ICAO landing forecasts or TAF3	40
4.10 Two destination alternate aerodromes for flight	41
4.11 Additional requirements—certain alternate and isolated destination aerodromes.....	41
4.12 Isolated destination aerodromes	43
4.13 Portable runway lighting—requirement to plan destination alternate aerodrome	44
4.14 Portable runway lighting at isolated destination aerodromes.....	44
4.15 Runway lighting where no standby power	45
4.16 Runway lighting without standby power at isolated destination aerodromes	46
4.17 Pilot-activated lighting	47
4.18 Pilot-activated lighting at isolated destination aerodromes.....	47
4.19 EDTO en-route alternate aerodromes.....	48
4.20 Requirements in Division 2 may be varied	51
Division 3—Operational variations of the flight preparation (Part 121 alternate aerodromes) requirements	52
4.21 Operational variation approvals—alternate aerodrome requirements.....	52
Chapter 5—Operational flight plans	53
5.01 Pre-flight content of operational flight plans	53
5.02 End of flight information for operational flight plans.....	54
Chapter 6—Narrow runway width calculations	55
6.01 Scope of Chapter 6	55
6.02 Minimum runway width.....	55
Chapter 7—Fuel requirements	57
Division 1—Preliminary	57
7.01 Scope of Chapter 7	57
7.02 Definition of <i>destination alternate fuel</i>	57
7.03 Definition of <i>contingency fuel</i>	58
Division 2—Fuel requirements	59
7.04 General requirements	59
7.05 Amount of fuel that must be carried for a flight.....	59
7.06 Determining amount of fuel that must be carried for EDTO	61
7.07 Requirements for determining fuel before, and monitoring fuel during, flight	62
7.08 Procedures if fuel reaches specified amounts.....	63

7.09 Operational variations—fuel calculations	64
Chapter 8—Safety briefings and instructions	65
Division 1—Safety briefing cards	65
8.01 Safety briefing cards.....	65
Division 2—Requirements for safety briefing, instructions and demonstrations	66
8.02 Scope of Division 2, Chapter 8	66
8.03 Safety briefing, instructions and demonstrations before take-off	66
8.04 Safety instructions during flight.....	67
Chapter 9—Performance	69
Division 1—Take-off performance requirements: jet-driven aeroplanes and certain propeller-driven aeroplanes	69
9.01 Scope of Division 1, Chapter 9	69
9.01A Application of this Division	69
9.02 Maximum permitted take-off weight	69
9.03 Take-off distance requirements	70
9.04 Net take-off flight path requirements	70
9.05 Gross gradient requirements—take-off configuration	73
9.06 Level flight acceleration manoeuvre requirements	73
9.07 Gross gradient requirements—en route configuration	74
9.08 En route requirements	74
Division 1A—Take-off performance requirements: propeller-driven aeroplanes with maximum take-off weight not more than 5 700 kg	76
9.08A Scope of Division 1A, Chapter 9.....	76
9.08B Application of this Division.....	76
9.08C Definitions for this Division	76
9.08D Meaning of <i>factored take-off run</i>	76
9.08E Approval of take-off factor for aeroplanes	77
9.08F Maximum permitted take-off weight	77
9.08G Take-off requirements	77
9.08H Initial climb performance and obstacle clearance	78
9.08J Take-off requirements—additional requirements for aeroplanes with maximum take-off weight more than 3 500 kg.....	78
9.08K En route obstacle clearance for multi-engine aeroplane.....	79
Division 2—Landing performance	80
9.09 Scope of Division 2, Chapter 9	80
9.10 Pre-flight landing requirements—dry runway	80
9.11 Pre-flight landing requirements—wet or contaminated runway	81
9.12 Certain aerodromes—planned missed approach climb requirements	81
9.13 Landing distance—in-flight requirements.....	82
Chapter 10—Weight and balance	85
10.01 Standard weights	85
10.02 Weight and balance documents.....	86
Chapter 11—Equipment	88
Division 1—General	88
11.01 Purpose of Chapter 11	88

11.02 Standards etc.....	88
11.03 Aeroplane operator—Chapter 11 requirements	88
Division 2—Approvals, visibility and inoperative equipment	90
11.04 Approval of aeroplane equipment	90
11.05 Visibility and accessibility of equipment	90
11.06 Serviceability of equipment.....	91
Division 3—Flight instruments	92
11.07 Flight instrument requirements	92
Division 4—Operational equipment	95
11.08 Radiocommunication systems	95
11.09 Navigation equipment	95
11.10 Automatic pilot.....	96
11.11 Equipment to ensure clear view through the windshield	97
11.12 Internal doors and curtains	97
11.13 Survival equipment—remote areas and over water	97
11.14 Equipment to measure and record cosmic radiation	98
Division 5—Lighting systems	99
11.15 Cockpit and cabin lighting requirements.....	99
11.16 Anti-collision lights	99
11.17 Landing lights	100
11.18 Navigation lights	100
Division 6—Alerting and warning system requirements	101
11.19 Altitude alerting system and assigned altitude indicator.....	101
11.20 Aeroplane flown with inoperative altitude alerting equipment or assigned altitude indicator	101
11.21 Airborne collision avoidance system (ACAS).....	101
11.22 ACAS—requirements for use	102
11.23 Flight with inoperative ACAS or TCAS	102
11.24 Terrain awareness and warning system (TAWS).....	103
11.25 Flight with inoperative TAWS equipment	103
11.26 Airborne weather radar equipment.....	103
11.27 Flight with inoperative airborne weather radar equipment	103
Division 7—Flight recorders	104
11.28 Definitions—flight recorders	104
11.29 Flight data recorder	104
11.30 Cockpit voice recorder.....	104
11.31 Combination recorders	104
11.32 FDR, CVR and combination recorder technical requirements.....	105
11.33 Use of FDR, CVR and combination recorders.....	105
11.34 Flight with an inoperative FDR, CVR or combination recorder	106
11.35 Data link recorder.....	107
Division 8—Aeroplane interior communication systems	110
11.36 Flight crew intercommunication system	110
11.37 Crew interphone system	110
11.38 Public-address system	111
Division 9—Oxygen equipment and oxygen supplies	112
11.39 Definitions for Division 9, Chapter 11	112
11.40 Supplemental oxygen—pressurised aeroplanes	112
11.41 Supplemental oxygen—unpressurised aeroplanes	115

11.42	Oxygen masks usage requirements—pressurised aeroplane above FL 250.....	115
11.43	Oxygen dispensing units for passengers in a pressurised aeroplane	116
11.44	Protective breathing equipment—flight crew members.....	116
11.45	Portable protective breathing equipment.....	117
11.46	First-aid oxygen equipment—pressurised aeroplane	117
Division 10	—Emergency locator transmitters	119
11.47	Carriage of ELTs	119
11.48	ELT must be fitted or carried	119
11.49	ELT—basic technical requirements	120
11.50	Automatic ELT	120
11.51	Survival ELT	120
Division 11	—Portable emergency equipment	122
11.52	Hand-held fire extinguishers	122
11.53	First-aid kits.....	123
11.54	Emergency medical kit.....	124
11.55	Universal precaution kits.....	124
11.56	Crash axe or crowbar.....	124
11.57	Megaphones.....	125
Division 12	—Equipment for flights over water	126
11.58	Sea anchors etc. and sound signals—seaplanes and amphibians	126
11.59	Life jacket carriage requirements	126
11.60	Stowage of life jackets	126
11.62	Life raft carriage requirements	127
11.63	Stowage of life rafts	127
11.64	Underwater locating device (ULD).....	128
Division 13	—Surveillance equipment	129
11.65	Definitions	129
11.66	Carriage of surveillance equipment.....	131
11.67	Operation of surveillance equipment—general requirements.....	132
11.68	Mode S transponders and ADS-B OUT—specific requirements.....	133
11.69	Alternate GNSS position source for ADS-B OUT—requirements.....	135
11.70	Alternate ADS-B OUT equipment configuration—requirements.....	135
11.71	Aeroplane flown with no operative surveillance equipment.....	136
Chapter 12	—Flight crew training and checking	137
Division 1	—Flight simulator use: specific aeroplane types	137
12.01	Requirement to use flight simulators for certain kinds of aeroplanes	137
Division 2	—Initial training for flight crew	138
12.02	Scope of Division 2, Chapter 12	138
12.03	Flight crew—training facilities and devices: initial training.....	138
12.04	Flight crew—position description and responsibilities training.....	138
12.05	Flight crew—effective communication and coordination.....	138
12.06	Flight crew—fire and smoke: initial training	139
12.07	Flight crew—fatigue and fitness for duty.....	140
12.08	Flight crew—general-survival training	140
12.09	Flight crew—water-survival training	140
12.10	Flight crew—first-aid training.....	141
12.11	Flight crew—training for passenger handling.....	142
12.12	Flight crew—training in the physiological effects of flying	142

Division 3—Conversion training requirements for flight crew	144
12.13 Scope of Division 3, Chapter 12	144
12.14 Flight crew—training facilities and devices: conversion training.....	144
12.15 Flight crew—normal, abnormal and emergency procedures: conversion training	144
12.16 Flight crew—crew incapacitation procedures: conversion training.....	146
12.17 Flight crew—doors and exits: conversion training	146
12.18 Flight crew—evacuation slides etc.....	146
Division 4—Recurrent flight training for flight crew	148
12.19 Scope of Division 4, Chapter 12	148
12.20 Flight crew—recurrent flight training requirements	148
Division 5—Part 121 proficiency check	150
Subdivision A—Part 121 proficiency check for pilots	150
12.21 Scope of Subdivision A, Division 5 of Chapter 12	150
12.22 Proficiency check requirements	150
12.23 Cruise-relief co-pilots—proficiency check requirements	152
Subdivision B—Part 121 proficiency check for flight engineers	153
12.24 Flight engineers—Part 121 proficiency check requirements	153
Division 6—Annual emergency and safety equipment training for flight crew	154
12.25 Scope of Division 6, Chapter 12	154
12.26 Flight crew—training facilities and devices: annual training	154
12.27 Flight crew—general requirements: annual emergency and equipment training.....	154
12.28 Flight crew—items of emergency and safety equipment.....	154
12.29 Flight crew—doors and other exits for passenger evacuation: annual training	155
Division 7—The 3-yearly emergency and safety equipment training and checking requirements for flight crew	157
12.30 Scope of Division 7, Chapter 12	157
12.31 Flight crew—training facilities and devices: 3-yearly training.....	157
12.32 Flight crew—3-yearly emergency and safety equipment training	157
Chapter 13—Cabin crew training and checking	159
Division 1—English Language proficiency	159
13.01 Prescribed requirements for English language proficiency.....	159
13.02 English language tests, education or work experience.....	160
Division 2—Senior cabin crew members: training and checking	161
13.03 Scope of Division 2, Chapter 13	161
13.04 Senior cabin crew training.....	161
13.05 Senior cabin crew competency checks.....	161
Division 3—Training facilities and devices	162
13.06 Scope of Division 3, Chapter 13	162
13.07 Training facilities—general requirements.....	162
13.08 Training devices—general requirements.....	162
13.09 Firefighting training facilities and devices.....	163
13.10 Water-survival training facilities.....	163
13.11 Devices used for training on emergency or safety equipment	164
13.12 Cabin training devices etc. must be representative	164
13.13 Devices for emergency evacuation and emergency exit training.....	165
Division 4—Initial training for cabin crew	166
13.14 Scope of Division 4, Chapter 13	166

13.15 Cabin crew—knowledge of aviation, regulations, duties and responsibilities.....	166
13.16 Cabin crew—effective communication and coordination.....	167
13.17 Cabin crew—fire and smoke: initial training.....	167
13.18 Cabin crew—general-survival training.....	168
13.19 Cabin crew—water-survival training.....	168
13.20 Cabin crew—first-aid training.....	169
13.21 Cabin crew—training for passenger handling.....	170
13.22 Cabin crew—training in the physiological effects of flying.....	170
Division 5—Conversion training for cabin crew	171
13.23 Scope of Division 5, Chapter 13.....	171
13.24 Cabin crew—fire and smoke: conversion training.....	171
13.25 Cabin crew—doors and exits: conversion training.....	171
13.26 Cabin crew—evacuation slides.....	172
13.27 Cabin crew—crew incapacitation procedures.....	173
13.28 Cabin crew—aircraft systems: conversion training.....	173
13.29 Cabin crew—normal, abnormal and emergency procedures: conversion training.....	173
Division 6—Annual training for cabin crew	175
13.30 Scope of Division 6, Chapter 13.....	175
13.31 Cabin crew—general requirements: annual training.....	175
13.32 Cabin crew—emergency and safety equipment: annual training.....	175
13.33 Cabin crew—doors and other exits for passenger evacuation: annual training.....	176
13.34 Cabin crew—abnormal, emergency and safety procedures: annual training.....	177
Division 7—Three-yearly training and checking for cabin crew	179
13.35 Three-yearly training requirements.....	179
Chapter 14—Emergency evacuation demonstrations and procedural requirements	180
Division 1—General emergency evacuation procedure requirements	180
14.01 Scope of Chapter 14.....	180
14.02 General requirements.....	180
14.03 Crew members, emergency exits and cabin configuration etc.....	180
Division 2—Aeroplanes carrying more than 44 passengers	181
14.04 Application etc.....	181
14.05 Emergency evacuation procedures.....	181
14.06 Requirement to conduct demonstrations.....	181
14.07 Demonstration requirements.....	182
14.08 Standards for demonstrations.....	183
14.09 Manner of conducting demonstration.....	184
14.10 Demonstrations of ditching procedures only.....	186
Notes to Part 121 (Australian Air Transport Operations—Larger Aeroplanes) Manual of Standards 2020.....	187
